

FleetSafer®

THE ENTERPRISE SOLUTION FOR DISTRACTED DRIVING

Aegis offers the broadest portfolio of products to address distracted driving due to the use of portable electronic devices in vehicles

FleetSafer® from Aegis Mobility is software for smartphones and tablets that detects driving state and automatically puts the device in "Safe Mode" while driving. In Safe Mode, a curtain screen blocks access to the keyboard and screen. All notifications and alerts are silenced – including incoming calls, texts and emails.

FEATURES

Automatically activates/deactivates "Safe Mode"

Blocks distractions including calls, texts and browser

Quick access at end of drive

Industry leading battery life and accuracy

Activation options based on time of day, day of week

Reports and alerts on infractions and overrides

Deploys over the air or via a mobile device management platform

Optionally whitelist apps and phone numbers

Optionally permit handsfree calls and passenger override

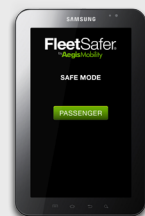

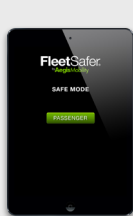

Emergency calls always allowed

BROAD DEVICE COVERAGE

Apple iOS*
OS 6.0–7.0

Android Tablets
OS 4.0–4.3

Android Handsets
OS 2.3.3, 4.0–4.3

BlackBerry
OS 5.0–7.1

Kyocera Dura**
J2ME

***Apple iOS 6 and 7:** Handsfree calls are always permitted and can be reported as infractions.
***Apple iOS 7:** Incoming calls may be received, but if answered without handsfree, will always be reported as infractions.

****Kyocera Dura:** Fiddle event reporting is not available for the Dura Plus (candy bar form factor).
For devices not already subscribed to a Sprint data plan, FleetSafer requires 2–4 MB of data per month. Pricing and terms for data plans are defined in coordination with Sprint.

MULTIPLE TRIGGER OPTIONS

GPS
Software only
< 1 min detection
10% battery impact

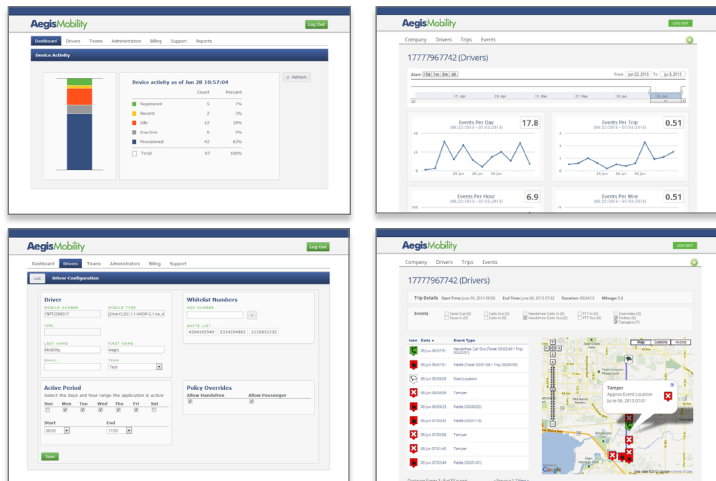

OBD
Real-time detection
< 5 sec detection
5% battery impact

TELEMATICS
Leverage existing investment
< 1 min detection
5% battery impact

FleetSafer Crossroads

All devices, regardless of trigger method or device type, can be centrally controlled and administered through the Aegis Crossroads portal, a cloud-based service that provides a uniform interface for configuration, deployment, analytics, auditing and reporting.

ADMINISTRATION PORTAL

Policy Configuration:

Customize and apply policy options that are enforced by the software.

Enterprise Administration:

Centralized control for management of and deployment to individuals or groups according to an organization's structure.

Client Support:

Web-based trouble ticketing and issue management with complete product documentation and FAQs.

Systems Integration:

Integrates with existing directory services (Active Directory, LDAP) and human resources management systems such as PeopleSoft.

REPORTING PORTAL

Comprehensive Analytics and Reporting:

Customized reports and real-time alerts on usage, policy conformance and infractions.

Dashboards and Drill-down:

Dashboards chart the frequency of distracting events while driving. Drill down to examine the details of each driver's trips and events and plot them on maps.

Easy Data Export: Data can be exported for analysis using other tools.

Application Programming Interface:

Reporting APIs enable integration with existing corporate reporting systems.

PLATFORM

Flexibility:

The Aegis Context Request Node (ACORN) is the technology platform for the FleetSafer solution and all future enterprise systems from Aegis Mobility.

Scalability and Reliability:

ACORN is a fully scalable platform that can support millions of users with complete failover, redundancy and disaster-recovery systems.

AEGIS CONTEXT ENGINE

Efficiency:

The context engine is a lightweight software component that runs on mobile devices, determines context and reports context to ACORN.

Aegis Mobility is the 2013 winner of the Frost & Sullivan Best Practices Award for North American Distracted Driving Solutions

SUPPORT

Trial Support:

Training on the FleetSafer client and Crossroads portal, and assistance in configuring phone policies and administrator access.

Deployment Support:

Creation of a deployment plan that meets your organization's needs and structure, and sharing of best practices for the management of distracted driving software.

Unlimited: North America-based phone and email technical support.
