

REFERENCE SITES WITH NO FURTHER ACTION (NFA) Letters Available Upon Request

At Pure Enviro Management we have built a foundation of individuals that have extensive expertise in successfully lowering contamination levels that exceed government expectations. Our experience and our patented processes allow us to complete remediation projects on schedule and on budget. Our strategic partners include experienced individuals, scientists and an exclusive right to bio technology from Brigham Young University. As a team we have completed:

- **Over 1,200 site remediation projects**
- **Over 300 underground gas tank removals**
- **Over 800 site audits**

Our background allows us to not only complete the job effectively, but efficiently. As an additional service to make the process easier for our clients, we also complete the paperwork and reports required by the government for remediation completion.

The following list details some of our previous clients. We have NFA letters for all of the below listed sites and are happy to provide copies of those letters upon request.
